

## **Moulton Speedwatch Report for September 15<sup>th</sup> Meeting**

The Speedwatch group activities have reduced recently due to the enforced requirement to have three members at each check. Despite discussions about the efficiency of using three people we are not allowed any concessions.

We have recently lost two members due them moving out of the area which is disappointing, and we thank them for their valued service.

Fortunately, we potentially have a new member joining us but we really need to encourage more people to join. It is interesting the number of people who congratulate us on our activities. This suggests that residents value our activities, we just need to find a way to get more of them to join us!

On reviewing the VAS data for the last two months it is disappointing to see the number of vehicles travelling at speeds that are in excess of the reporting threshold of 35mph. The summary of these is as follows: -

	35mph+	46mph+
Newmarket Road		
Incoming	3,842	592
Outgoing	7,007	874
Dalham Road		
Incoming	1,691	127
Outgoing	3,602	264
Kennett Road		
Incoming	3,368	241
Outgoing	25,503	2,739

It is interesting to compare these figures with the recent data from the Police speed checks which show low numbers of speeding motorists.
